REPORT OF THE TRUSTEES.

Boston, February 2, 1914.

HON. JAMES M. CURLEY,

Mayor of the City of Boston:

SIR,—In compliance with the ordinances, the Trustees of the Boston City Hospital present the following report of its condition for the year ending January 31, 1914. This is the fiftieth annual report of the Hospital Department, which consists of the main hospital, the South Department for infectious diseases, the Haymarket Square Relief Station, the East Boston Relief Station and the Convalescent Home in Dorchester.

The Board of Trustees was organized on May 5, 1913, by the election of Mr. A. Shuman as president and Mr. Joseph P. Manning as secretary.

In April, 1913, Mr. Conrad J. Rueter was reappointed a trustee for the term ending April 30, 1918.

EXPENDITURES.

The entire expenditures for all departments of the hospital for maintenance during the fiscal year were \$616,301.02. Of the amount spent for maintenance, \$408,503.47 was expended upon the hospital proper (including X-Ray Clinic, \$3,987.19, and Orthopedic Shop, \$2,003.54); \$24,733.76 on account of the ten Out-Patient Departments; \$117,854.20 on account of the South Department; \$38,220.27 on account of the Haymarket Square Relief Station; \$17,154.72 on account of the East Boston Relief Station; \$9,834.60 for the Convalescent Home. Of the total amount spent on the Pathological Laboratory, \$12,743.82, \$8,028.60 is included in the hospital proper expenditures, \$127.44 in the Out-Patient Department, \$4,460.34 in the South Department and \$127.44 in the Haymarket Square

Relief Station expenditures. Of the total amount spent on the X-Ray Laboratory and Photographic Department, including Evening Clinic, \$15,920.64, \$11,147.26 is charged to the hospital proper and \$4,773.38 to the Out-Patient Department. The total amount spent in determining the settlement of nonpaying patients, \$1,132.55, is divided evenly between the hospital proper and the South Department.

To the amount expended for the main hospital, including the South Department, \$526,357.67, there should be added the difference in the amount of stock on hand February 1, 1914, which was \$107 less than on January 31, 1913, making the total amount properly chargeable as the expenditures for maintenance of the main hospital for the year \$526,464.67. (See Table No. 2 in the superintendent's report.) This sum was expended for 41,448 weeks' board of patients, at a cost per capita of \$12.67, but if we deduct the money collected for paying patients, interest on trust funds and other income, the net cost to the city per capita per week was \$9.95. The cost of subsistence supplies was \$150,819.66; the total weeks' board for an average of 1,399 persons was 72,972. This gives a cost per person for uncooked food supplies of \$2.07 per week, or \$0.29 $\frac{1}{4}$ per day.

PAYING PATIENTS.

During the year there was collected for the care and treatment of patients of all classes the sum of \$113,722.17, itemized as follows: There was received from the Commonwealth of Massachusetts for the board of patients at hospital proper, \$26,012; at the South Department, \$2,574; from various cities and towns, for hospital proper, \$21,846.02; collected at the superintendent's office, on account of private room, ward and Out-Patient Department paying patients, \$29,668.84, of which \$4,672.98 was from insurance cases; for board of paying patients at the South Department, \$3,527.87; for the board of patients at the Haymarket Square Relief Station, \$1,591.85, of which \$1,000.64 was from

insurance cases; for the board of patients at the East Boston Relief Station, \$460.53, \$222.36 of this being from insurance cases. There has also been collected for the hospital, by the Board of Health, for the care of infectious cases at the South Department, and paid to the City Collector, the additional sum of \$28,041.06.

The following is a tabular statement of the income from paying patients.

FEBRUARY 1, 1913, TO JANUARY 31, 1914, INCLUSIVE.

	Hospital Proper.	South Department.	Haymarket Square Relief Station.	East Boston Relief Station.	Totals.
Collected at the hospital:					
From the state.....	\$26,012 00	\$2,574 00			\$28,586 00
From cities and towns.....	21,846 02				21,846 02
From ward and private room patients.....	24,995 86	3,527 87	\$591 21	\$238 17	29,353 11
From insurance cases:					
House cases.....	4,121 98		381 64	98 36	4,601 98
Out-patient cases.....	551 00		619 00	124 00	1,294 00
Totals.....	\$77,526 86	\$6,101 87	\$1,591 85	\$460 53	\$85,681 11
Collected by Board of Health for contagious cases.....		28,041 06			28,041 06
Totals.....	\$77,526 86	\$34,142 93	\$1,591 85	\$460 53	\$113,722 17

A table showing the revenue received from paying patients, interest on trust funds, sale of old material, and other sources, will be found on page 89 of the superintendent's report.

HOSPITAL RENOVATIONS.

The usual amount of minor repairs have been done throughout the year. It will be necessary, in the near future, to have new roofs on many of the buildings, notably those of the South Department, these roofs having been in use nearly twenty years.

FIRE IN THE COAL POCKET.

In the month of February a fire broke out in the coal pocket. This damaged it to such an extent that it became necessary to have an emergency structure erected for the discharge of coal. An appropriation of \$1,000 was made by his Honor the Mayor, to allow of repairs being made on the coal pocket. At the present time this subsidiary structure is being used. It is very important that a new fireproof coal pocket should be built, in order to diminish the expense of handling coal, not only in discharging, but also in feeding the furnaces with a supply of fuel. This matter has been very carefully considered by the trustees, and they are of the opinion that a sufficient sum of money should be appropriated for this work as soon as possible. The sum of \$10,244.29 has been required for the proper handling of coal, due to lack of sufficient appliances in the coal pocket. Although this fire practically destroyed the structure, it did not extend to any of the hospital buildings, neither did it interfere with the heating plant, although at one time there was great danger that the entire heating and lighting plant would have to be discontinued for a time, owing to the fact that the water used to control the fire practically filled the fire room, but by a judicious use of siphons and pumps this danger of crippling the heating and lighting plant was prevented. This is a very important argument in favor of a fireproof coal pocket.

ORTHOPEDIC SHOP.

The orthopedic shop has been established and has now been in operation about four months. A considerable amount of machinery has been purchased for this shop, consisting of motor, forge, drill press, grinder and lathe. Since it was opened 114 patients have been supplied with different kinds of apparatus. The question of charging for this apparatus is being carefully considered by the trustees.

SPECIAL TRAINING FOR ORDERLIES.

The school for orderlies has accomplished much good during the past year. The standard has been materially increased, and it is hoped that in the future greater advancement will be made. The orderlies graduating have passed creditable examinations at the State House in order to be licensed as registered nurses.

SOUTH DEPARTMENT.

The expenditure of this department has been \$117,854.20. If to this is added the difference in the amount of stock on hand at the beginning and close of the year, which was \$232 less at the end of the year, it would give \$118,086.20 as the amount properly chargeable to maintenance. This sum was expended upon 2,751 patients, and, divided by 13,350 weeks' board, gives \$8.85 as the per capita cost per week; but if we deduct the money collected for paying patients and other income (for detail of revenue see table on page 89) the net cost to the city per capita per week was \$6.29. The cost of subsistence supplies was \$32,508.57. The total weeks' board for an average of 388 persons was 20,246. This gives a cost per person for uncooked food supplies of \$1.61 per week, or 23 cents per day. This very small average cost is explained by the fact that 84 per cent of the patients are children. There will be found on pages 68 to 70 a detailed account of the expenditures of this department in the various subdivisions, which are kept on the same general plan as those of the hospital proper.

During the nineteen years that the department has been in operation, 45,651 patients have been received, nearly all ill with an infectious disease.

The following is an extract from the report of the Advisory Board of the South Department, which may be of interest:

Twenty-four hundred and three patients were admitted to the South Department in 1913, which is 470 more than were received the previous year. As usual the demand for

room exceeded the supply. No case was summarily refused admission to the hospital, as they were all inspected by the Board of Health and only the severest cases admitted. For example, from November 25 to December 31, 120 cases of scarlet fever referred for admission were investigated by the Board of Health and seventy-six were admitted. Six were admitted to other hospitals at their own expense and forty were allowed to remain at home, although some of them wished to go to the hospital.

While present conditions may justify to a certain extent the home treatment of contagious disease, yet the consensus of opinion everywhere is that the welfare of the patient and of the community is best served by placing these patients in hospitals especially provided for them. This rule applies with especial force to the poorer classes who are undoubtedly far better off even in our crowded wards than they can be in their homes. Among the well-to-do people the conditions may justify a more frequent home treatment, although the preference of this class is very often in favor of hospital. That the home treatment of contagious diseases necessarily increases the danger to the community cannot be doubted. The number of foci are thereby increased, the friends and attendants may become careless, isolation can seldom be as absolute, and the full control of conditions for the necessary period is by no means as assured in the private house as it is in a well conducted hospital. Hence the importance of increasing our accommodations for this class of unfortunates in the community.

About 4 per cent of the house staff have suffered from contagious disease the past year. One third of the nurses have been laid off for that and other affections. The former have lost 203 days' service and the latter over sixteen months. The great economic loss in services in caring for the sick, to say nothing of the human side, has caused much anxiety. As a prevention, the following have suggested themselves:

1. Physical examination of the nurses before admission to the hospital, especially as to nose and throat disease and the correction of these conditions before admission to the school.

2. Less crowding in the wards and fewer patients per nurse. It is noticeable that less sickness occurs during the noncrowded periods, both among the nurses and house officers.

The study of vaccines for whooping cough is being made and it is to be hoped that an antitoxin for this disease may be discovered.

In conclusion, it may be said that the work of the department has gone on well during the year. The great relief to the patients and their friends has been exceeded only by the protection of the community.

SURGICAL DEPARTMENT.

The following is an extract from the report of the Senior Surgeon:

Perhaps the most important change in the surgical services during the past year has been the establishment of a fourth service for the treatment of genito-urinary cases. It is hoped that this service will prove its usefulness to the hospital by the increased efficiency with which these cases can be treated.

It is generally agreed that conditions on the operating floor have been improved during the past year, and this improvement is fully appreciated by the surgeons.

MEDICAL DEPARTMENT.

In the medical services the number of patients treated this year has been larger than during the previous year. It is very important that there should be special wards for the treatment of typhoid fever. A certain number of patients with tuberculosis not of an acute type are treated in the hospital each year. These patients should also be separated from other patients as much as possible.

GYNÆCOLOGICAL DEPARTMENT.

During the year the gynæcological service has performed a large amount of work in a most satisfactory manner. The out-patient service has done excellent work and the constant large attendance in this department shows that the work is appreciated by those for whom it was intended. The service in the hospital has been carefully and conscientiously performed by the various members of the staff with most satisfactory results. The emergency work has received careful attention and it can fairly be said that at no time has any unnecessary delay in attendance on emergency

cases, whether during the day or night, been noted. The operative results obtained in the department have been most satisfactory. In connection with the routine work in the department there have been a considerable number of both pathological and normal obstetric cases, a fact which has caused considerable concern, although obstetrics should naturally be associated with gynecology. It is felt, however, that our equipment is not sufficient to give these cases the care which they require in many instances, and that if the obstetric service continues to increase, special arrangements for these cases will have to be provided.

NEUROLOGICAL DEPARTMENT.

The neurological service has continued to treat the cases of acute psychoses which come to the hospital and the benefit of such treatment referred to in the last report is more and more manifest. The work of the service for the last four years was reported at meetings of the Boston Society of Psychiatry and Neurology and the New York Psychiatric Society, and met with general approval. A very important line of work in this department has been inaugurated, namely, the treatment of various nervous diseases of syphilitic origin by intraspinal injections of salvarsanized serum. This is a method requiring especial skill and experience, as the technique is difficult and can be successfully carried out only by those who have especial training. In the last year fifty-two injections have been given to nineteen patients, with no untoward results. The treatment has been followed by marked benefit in cases formerly regarded as incurable, and the outlook for the future, if this work continues, is most hopeful. In addition, a special study has been undertaken of a considerable number of syphilitic patients to detect the earliest symptoms of involvement of the nervous system and to begin appropriate treatment early. In this way it is possible that some cases of tabes and general paresis may be cured.

X-RAY DEPARTMENT.

The physician in charge of the X-Ray Department makes the following report:

The clinic for precautionary X-ray examinations was initiated November 1, 1912, and up to February 1, 1914, careful and complete examinations of 1,031 patients have been made. This work has been done in satisfactory cooperation with other institutions of the city, and might well be continued if the trustees of the hospital had the means at their disposal for this purpose. Last spring the trustees voted a sum of money for much needed new apparatus in the X-Ray Department. Largely in consequence of this vote the physician for X-ray service spent the summer abroad in order to study other X-ray departments and their equipments. Many of the clinics and hospitals in the largest cities were visited, all of which afforded excellent opportunities to learn what is being done in Europe. Some apparatus, which will prove a valuable addition to the equipment of the X-Ray Department, was ordered and it is expected will shortly be installed.

Recently a new X-ray tube has been invented by Dr. W. D. Coolidge of the Research Laboratory of the General Electric Company of Schenectady. This tube has been tried in the X-Ray Department and has already been in use there sufficiently long to demonstrate its good qualities. It is a pleasure to state that it will be a great boon to all who have to do X-ray work. By means of it the amount of X-light for any special purpose is far more completely under control than it has ever been before and the efficiency and durability of the tube mark a long step in advance of anything hitherto obtainable.

During the past year the examination of something over 200 patients by the X-rays, after the administration of a bismuth meal, has demonstrated to many the great value of this method in the diagnosis of diseases of the gastro-intestinal tract. Subcarbonate of bismuth

suspended in buttermilk is given the patient by mouth. The shadow of the mass swallowed may be seen and easily followed in its course to the stomach and through the intestines by means of the fluoroscopic screen, any abnormality may be noted, and a radiograph taken as a record, at any period during the passage of the bismuth meal. Several observations are made in each case from time to time during twenty-four or forty-eight hours, and the whole test repeated for confirmation of findings, after an interval of days if necessary.

Bismuth may be given also by rectal enema for examination of the lower gut. The administration of bismuth and the following X-ray examination is attended by no pain, nor even discomfort to most patients. The extra work entailed by these time-consuming examinations is greater than any others which have to be made, but as the conditions in these diseases are often obscure, the gain is so great as to fully justify the outlay required.

The information obtained by means of the X-rays in the study of stricture of the œsophagus, cancer, ulcer and adhesions about the stomach and intestines has made the diagnosis of these oftentimes obscure diseases more accurate, so that many conditions formerly considered hopeless may be alleviated or even cured by surgery.

All connected with the department are devotedly interested in their work, and this spirit makes it possible to accomplish what could not otherwise be done.

The following table shows the work of the department during the past three years:

	1911.	1912.	1913.
Number of patients of whom photographs have been made.....	133	60	110
Number of patients of whom radiographs have been made.....	6,548	5,952	7,693
Number of patients of whom fluoroscopic examinations have been made.....	572	833	803
Total number of X-ray and radium treatments.....	2,064	2,264	2,453
Total number of photographs, radiographs, examinations and treatments.....	9,317	9,109	11,059
Total requisitions filled.....	6,505	6,845	8,606
Total number of negatives made.....	9,562	11,044	12,419
Number of patients of whom bismuth examinations have been made (included in above).....			201
Number of negatives of bismuth cases (included in above).....			625

CLINIC FOR PRECAUTIONARY EXAMINATIONS.

Number of patients examined from November 1, 1912,	
to January 31, 1914, inclusive	1,031
Number of patients examined from February 1, 1913,	
to January 31, 1914, inclusive	829

DEPARTMENT FOR VACCINE AND SERUM THERAPY.

The work of this department has been carried on with painstaking assiduity.

The total number of patients receiving bacterial vaccines was 664; number of visits to this clinic, 3,250; number of vaccine inoculations, 3,047. The total number of patients given antisyphilitic treatment was 158. The total number of visits for this treatment (exclusive of visits for Salvarsan injection) was 1,200. The number of Salvarsan injections was 484; Mercury injections, 297; Luetin tests, 102; provocative Salvarsan injections, 20; blood taken for Wassermann tests, 374.

PATHOLOGICAL LABORATORY.

The amount of routine work in the laboratory increases yearly, owing to new lines of work such as the Wassermann test for syphilis and more recently the Schwartz test for gonococcus, and to increased appreciation on the part of the clinical staff of what the pathological laboratory can do in the way of aiding them in the study of their cases. The various members of the laboratory staff are, therefore, kept thoroughly occupied. Any spare time is devoted to working up for publication those cases which seem of unusual interest or in pursuing different lines of investigation.

This year for the first time it has been possible, owing to the assistants having been to some degree relieved of the burden of ordinary routine work, to study systematically the virulence of the diphtheria bacilli persisting for months in many of the children at the South Department. The result has been that it has been possible to send many of the children home early

without danger of infecting others because the bacilli they were harboring were not virulent. At the same time the hospital has been relieved from the considerable financial burden of keeping them any longer than is necessary.

The chief research work during the past year has been the continued study of alcoholic cirrhosis and of acute lead poisoning. An attempt has been made to determine the relation which seems to exist between the two, because in both the same peculiar type of lesion is produced in the cells of the liver. So far as can be ascertained this peculiar lesion is not caused in any other way. It seems probable that under certain conditions alcohol acting on the lead normally contained in the liver produces an organic compound of it. It is known that organic compounds of lead are toxic in extremely minute doses. Experimental work is being carried on with one of these organic compounds, namely, lead triethyl acetate.

A differential stain for nerve fibers, which can be applied to pathological tissues, has long been needed. Much experimental work covering many years has been done with this object in view; recently by means of a new mordanting solution a fairly reliable differential stain has been secured. Its chief use will probably be in the study of the repair of sutured nerves and for demonstrating the nerve fibers produced in neuroblastomata.

The most important work in connection with the Pathological Department is Doctor Mallory's book, "The Principles of Pathologic Histology," which has received most creditable notice from all the leading medical journals in the country and is now the accepted text-book in many of the medical schools. This book is based upon an analysis of the pathologic material which has been collected and studied in the pathological laboratory of the Boston City Hospital during the past seventeen years.

It is very important that more autopsies should be performed, but the prevailing sentiment in the community is against the performing of autopsies.

The routine work of the laboratory has been conducted with great fidelity during the past year.

OUT-PATIENT DEPARTMENT.

The Out-Patient Department statistics may be found on pages 36, 38 and 41 in the superintendent's report.

The number of patients treated in the Out-Patient Department during the past year has been 47,385. The number of visits was 140,388.

During the past year a Saturday morning clinic for school children has been instituted, given up to special refractive cases. This is a step in advance and has proved of marked benefit.

HAYMARKET SQUARE RELIEF STATION.

This Relief Station has been in commission twelve years. In these twelve years 415,095 patients have been treated. The number of patients treated during the first year was 20,150, and during the present year 39,717, a very great increase. These patients received 42,065 days' treatment, at an average cost of 91 cents per day.

EAST BOSTON RELIEF STATION.

In the five years that the East Boston Relief Station has been in operation 72,470 patients have been treated. For the year ending January 31, 1914, 13,060 patients were treated. These patients received 31,106 days' treatment, at an average cost of 55 cents per day, as against 62 cents for the year 1912-13.

On November 12, 1913, the Police Department notified the trustees that they could no longer perform the ambulance service for the East Boston Relief Station. On November 25, 1913, it became necessary to make arrangements for the board of a horse and the services of a driver to perform the ambulance service

at the East Boston Relief Station. This arrangement is in force at the present time, and so far has worked satisfactorily.

CONVALESCENT HOME.

The number of patients treated during the year was 397, who received 7,771 days' treatment, at an average daily cost of \$1.28.

CHANGES IN RULES.

The rules were changed:

By permanently installing the Department of Vaccine and Serum Therapy, placing it in charge of a senior and a junior physician.

By establishing the genito-urinary service.

Creating the positions of Senior Surgeon for Diseases of Women and Senior Surgeon for Diseases of Ear and Throat.

Increasing the number of consulting physicians and surgeons to fourteen, the number of senior physicians to three, of senior surgeons to three, and the number of second assistant visiting physicians to nine.

Establishing the position of a permanent Fourth Assistant Visiting Surgeon for Diseases of Women.

Altering the rule for autopsies, so that the signature of one trustee and one member of the staff be required to give permission for autopsies when there are no known relatives.

Making the rule that no patient be kept when ready for discharge unless by permission of the trustees.

Altering the rule in order to permit head nurses to remain out until midnight.

MEDICAL AND SURGICAL STAFF.

The following are the changes in the Medical and Surgical Staff during the year just closed:

Francis H. Williams, M. D., resigned his position as Visiting Physician, and was appointed to the position of Senior Physician.

Charles M. Green, M. D., Senior Visiting Surgeon for Diseases of Women, resigned and was appointed Senior Surgeon for Diseases of Women.

Morton Prince, M. D., Physician for Diseases of the Nervous System, resigned and was appointed to the position of Consulting Physician.

George A. Leland, M. D., Visiting Surgeon for Diseases of Ear and Throat, resigned and was appointed Senior Surgeon for Diseases of Ear and Throat.

George H. Monks, M. D., Surgeon-in-Chief, resigned and was appointed to the position of Consulting Surgeon.

Horace D. Arnold, M. D., Visiting Physician, resigned. In accepting Dr. Arnold's resignation the trustees wish to express their full appreciation of his long and faithful service. The name of Arnold, as father and son, has been so long connected with the hospital that the trustees regret sincerely that Dr. Arnold has decided to sever his connection with the institution.

Arthur M. Dodge, M. D., Anæsthetist; Hilbert F. Day, M. D., temporary Fourth Assistant Visiting Surgeon; Otto J. Herman, M. D., temporary Fourth Assistant Visiting Surgeon, have resigned their positions.

The following appointments have been made: Thomas Ordway, M. D., Second Assistant Visiting Physician; Halsey B. Loder, M. D., Third Assistant Visiting Surgeon; John T. Williams, M. D., Third Assistant Visiting Surgeon for Diseases of Women; James L. Huntington, M. D., Third Assistant Visiting Surgeon for Diseases of Women; Frederick L. Good, M. D., Fourth Assistant Visiting Surgeon for Diseases of Women; George P. Howe, M. D., Assistant to the Physician for Diseases of the Skin.

The following temporary appointments have been made: For the position of Assistant to the Physicians to Out-Patients, Harold W. Dana, M. D., for six months beginning July 1, 1913; for the position of Fourth Assistant Visiting Surgeon, Irving J. Walker, M. D., for six months beginning February 14, 1913, also for six months beginning August 14, 1913; Oliver G.

Tinkham, M. D., for six months, beginning February 14, 1913; for the position of Fourth Assistant Visiting Surgeon for Diseases of Women, Raymond S. Titus, M. D., for six months, beginning July 1, 1913; John T. Williams, M. D., for the months of August and September; for the position of Assistant to the Physicians for Diseases of the Nervous System, Alfred A. Fenton, M. D., for six months, beginning June 10, 1913; W. J. Daly, M. D., Hale Powers, M. D., LeRoy A. Luce, M. D., for six months, beginning April 18, 1913; Walter B. Swift, M. D., for six months, beginning August 1, 1913; for the position of Assistant in the Ear and Throat Department, Herbert G. Shaw, M. D., for six months, beginning September 12, 1913.

The following promotions have been made: John W. Bartol, M. D., from First Assistant Visiting Physician to Visiting Physician; Ralph C. Larrabee, M. D., from Second Assistant Visiting Physician to First Assistant Visiting Physician; Franklin S. Newell, M. D., from Junior Visiting Surgeon for Diseases of Women to Senior Visiting Surgeon for Diseases of Women; Ernest B. Young, M. D., from First Assistant Visiting Surgeon for Diseases of Women to Junior Visiting Surgeon for Diseases of Women; Nathaniel R. Mason, M. D., from Second Assistant Visiting Surgeon for Diseases of Women to First Assistant Visiting Surgeon for Diseases of Women; Robert M. Green, M. D., from Third Assistant Surgeon for Diseases of Women to Second Assistant Visiting Surgeon for Diseases of Women; Elliott P. Joslin, M. D., from First Assistant Visiting Physician to Visiting Physician; Franklin W. White, M. D., from Second Assistant Visiting Physician to First Assistant Visiting Physician; Fred B. Lund, M. D., from Visiting Surgeon to Surgeon-in-Chief; Frederic J. Cotton, M. D., from First Assistant Visiting Surgeon to Visiting Surgeon; L. R. G. Crandon, M. D., from Second Assistant Visiting Surgeon to First Assistant Visiting Surgeon; Horace Binney, M. D., from Third Assistant Visiting Surgeon to Second Assistant

Visiting Surgeon; Edgar M. Holmes, M. D., from Surgeon for Diseases of Ear and Throat to Visiting Surgeon for Diseases of Ear and Throat; George L. Vogel, M. D., from Assistant Surgeon for Diseases of Ear and Throat to Surgeon for Diseases of Ear and Throat; Arthur W. Fairbanks, M. D., from Assistant Physician for Diseases of the Nervous System to Physician for Diseases of the Nervous System.

GIFTS AND BEQUESTS.

Notification was received of a bequest of \$500 under the will of the late Mehitable C. C. Wilson, with the provision that it be used for the benefit of the library. The trustees voted to establish the Mehitable C. C. Wilson Fund, the interest therefrom to be applied to the purchase of books for the Medical Library. Four hundred dollars of this bequest has already been received.

A donation of \$10,000 was received from a friend who did not wish his name to appear, to be used as a Fund for Special Nurses. The following paragraphs, written by the donor, explain the object of his gift:

FUND FOR SPECIAL NURSES.

The interest of this fund is to be used for the employment of special nurses for patients in the Boston City Hospital at the request of house physician or house surgeon indorsed by visiting physician or surgeon, subject to the approval of the superintendent. It is to be used for those patients for whom, for scientific or other reasons, a special nurse is desirable and yet cannot be supplied by the patient's relatives or friends, or by the city.

It was intended that this fund shall not be so used as to reduce the number of special nurses supplied by the city.

It is desired that any remaining part of the interest not used for special nurses, as above mentioned, be offered to the pathologist of the hospital to be used for his department as he may see fit.

November 12, 1913.

A FRIEND.

A legacy of \$5,000 was received under the will of Francis Bartlett. This is known as the Francis Bartlett Fund. It was voted to apply this to the purchase of radium and apparatus for the X-Ray Department.

The trustees desire to express their gratitude to the different organizations who have visited the wards on Sundays and cheered the patients with music; also to Dr. John Dixwell, who, as in former years, has favored the patients with instrumental music, and to Mrs. James Rea, for her kindness in furnishing music every Sunday, as she has done for the past seventeen years.

The trustees wish to express their appreciation of the numerous gifts of flowers, fruit and pamphlets during the past year.

The trustees for themselves and a grateful public would again express their appreciation to the Medical and Surgical Staff and to his Honor the Mayor and the City Council, for the helpful interest they have manifested towards the hospital and for the sick poor of Boston, and also to the superintendent and his assistants for their faithful and efficient service.

Respectfully submitted,

A. SHUMAN, *President.*

JOSEPH P. MANNING, *Secretary.*

CONRAD J. RUETER.

FRANCIS J. KEANY.

WILLIAM G. SHILLABER.

REPORT OF THE SUPERINTENDENT AND MEDICAL DIRECTOR.

THE BOSTON CITY HOSPITAL, February 2, 1914.

To the Trustees:

GENTLEMEN,— I have the honor to present herewith the annual report of the Hospital Department for the year ending January 31, 1914.

On June 1, 1864, the Boston City Hospital was opened for the admission of patients. Since that time the number of house patients treated in the different departments has been 371,259 and the number of out-patients, 1,433,100. The table on page 38 shows the number of patients who have applied for admission and been treated in the hospital proper and the South Department during the last ten years. The principal statistics for the year are shown on pages 40 and 41. The other tables are self-explanatory.

Patients admitted to the hospital according to services:

Medical services	4,605
Surgical services	5,611
Gynæcological service	1,308
Ophthalmic service	165
Aural and laryngological service	596
Neurological service	460
Dermatological service	89
Total	<u>12,834</u>

Number of visits of patients to the hospital for advice and treatment in the Out-Patient Departments:

Medical diseases	13,525
Surgical diseases	80,242
Diseases of the eye	5,852
<i>Carried forward</i>	<u>99,619</u>

<i>Brought forward</i>	99,619
Diseases of the ear and throat	12,836
Diseases of the skin	4,030
Diseases of women	3,368
Diseases of the nervous system	9,206
X-ray and radium treatment	3,212
X-ray examination, evening clinic	481
Vaccine and serum inoculation:	
Visits of out-patients	4,546
Visits of nurses and house officers for inoculation against typhoid fever	408
	<hr/> 4,954
Bone and joint diseases	235
Surgical out-patients treated in the accident rooms and not included elsewhere	7,228
	<hr/>
Total	145,169
Less visits counted more than once:	
In Vaccine and Serum Therapy Department,	4,546
In Orthopedic Department	235
	<hr/> 4,781
	<hr/>
Total visits	<u><u>140,388</u></u>

TABLE OF ADMISSIONS AND DEATHS FROM FEBRUARY 1, 1904, TO JANUARY 31, 1914.
Hospital Proper and South Department.

	Patients Examined for Ad- mission.	Patients Admitted.	Patients Acciden- tally Injured.	Number of Out- Patients Treated.	Number of Patients in Hospital at Beginning of Year.	Number of Patients Treated.	Died.	Rate of Mortality.
February 1, 1904, to January 31, 1905.....	14,974	10,837	772	37,608	711	11,548	1,160	.100
February 1, 1905, to January 31, 1906.....	13,645	10,357	738	38,650	652	11,009	1,143	.104
February 1, 1906, to January 31, 1907.....	14,943	11,679	704	37,938	673	12,352	1,332	.108
February 1, 1907, to January 31, 1908.....	15,227	11,751	853	40,246	734	12,485	1,406	.113
February 1, 1908, to January 31, 1909.....	17,741	12,403	898	42,310	758	13,161	1,401	.106
February 1, 1909, to January 31, 1910.....	15,397	11,674	928	39,482	828	12,502	1,327	.106
February 1, 1910, to January 31, 1911.....	16,261	13,074	1,075	40,032	785	13,859	1,483	.107
February 1, 1911, to January 31, 1912.....	15,747	13,033	1,232	38,129	744	13,777	1,611	.117
February 1, 1912, to January 31, 1913.....	17,557	14,236	1,420	42,309	779	15,015	1,609	.107
February 1, 1913, to January 31, 1914.....	19,115	15,237	1,362	47,385	933	16,170	1,696	.105

The total number of patients admitted to the wards since the opening of the hospital and South Department has been 348,552, and the number of out-patients has been 959,391.

HOSPITAL PROPER.

APPLICANTS EXAMINED FOR ADMISSION DURING THE
YEAR.

HOSPITAL PROPER.

PRINCIPAL STATISTICS, 1913-14.

Number of Patients.

Number of patients remaining in the hospital proper January 31, 1913	585
Admitted from February 1, 1913, to January 31, 1914, inclusive:	
Medical	4,605
Surgical	5,611
Gynæcological	1,308
Ophthalmic	165
Aural and Laryngological	596
Neurological	460
Dermatological	89
	<hr/> 12,834
Treated during the year	13,419
Discharged during the year	11,297
Died during the year	1,506
	<hr/> 12,803
<hr/>	
Number of patients remaining in the hospital January 31, 1914	616
Largest number of patients in the hospital at any one time	674
Smallest number of patients in the hospital at any one time	412
Daily average number of patients	538.9
Average number of days' stay of patients	14.66
Number of weeks' treatment given in hospital	28,098
Number of days' treatment given in hospital	196,688
Number of applicants for admission to hospital	16,198
Number of applicants rejected	3,364
Number of patients treated in Out-Patient Departments	47,385
Number of visits made by out-patients	140,388

Patients carried in ambulances	5,308
Number of patients accidentally injured, admitted . .	1,362

Number of out-patients treated in the Out-Patient Departments, classified according to diseases:

For medical diseases	6,539
For surgical diseases	21,482
For diseases of the eye	2,729
For diseases of ear and throat	4,817
For diseases of the skin	1,724
For diseases of women	1,095
For diseases of the nervous system	650
For X-ray and radium treatment	156
For examination of chest, X-ray evening clinic . .	829
For vaccine and serum inoculation:	
Out-patients treated	686
Nurses and house officers inoculated against typhoid fever	136
	<hr/> 822
For bone and joint diseases	105
Surgical out-patients treated in the accident rooms and not included elsewhere	7,228
	<hr/>
Total	48,176
Less patients counted more than once:	
In Vaccine and Serum Therapy Department,	686
In Orthopedic Department	105
	<hr/> 791
Total number of out-patients treated	<hr/> <u>47,385</u>

PRESENT CAPACITY OF THE HOSPITAL DEPARTMENTS.

The schedule of beds is as follows:

Hospital proper	655
South Department	340
Haymarket Square Relief Station	20
East Boston Relief Station	10
Convalescent Home	36
	<hr/> <u>1,061</u>

The distribution of the beds in the Main Department is as follows:

1910	1217	90	6.83	93.16	184	34	18.47	81.52
1911	1069	82	7.67	92.32	154	24	15.58	84.41
1912	784	72	9.18	90.81	74	17	22.97	77.02
1913	1212	115	9.48	90.51	137	38	27.73	72.26
Total	25390	2670	10.43	89.56	3047	946	31.04	68.95

The death rate from all diseases, deducting deaths within twenty-four hours of admission	5.3
Number of days' board given persons	141,722
Number of weeks' board given persons	20,246
Total expenditures	\$117,854.20
Average weekly cost per patient	\$8.85

If a comparison is made between the South Department and the hospital proper as to the number of days' board given patients, it will be found that at the former it is 93,450, while at the latter it is 196,688.

Charts A, C, D and Table B are based on the figures of the calendar year, as is the universal custom in making tables of vital statistics, and not on the financial year.

(C)

Ratio of Mortality of Diphtheria per 10,000 of the Population in Boston, from 1877 to 1913, inclusive.

Average Ratio of Mortality from 1877 to 1894, inclusive, 13.87.

Average Ratio of Mortality from 1895 to 1913, inclusive, 4.46.

Chart A shows the percentage of mortality of diphtheria at the Boston City Hospital proper and at the South Department from 1888 to 1913, inclusive, and also the percentage of mortality of intubations for the

same time. It will be noticed from this chart that since the South Department was opened in 1895 there has been a marked diminution not only in the death rate of all types of diphtheria but also in intubation cases.

(D)

Ratio of Morbidity and Ratio of Mortality of Scarlatina in Boston, per 10,000 of the Population, from 1887 to 1913, inclusive.

Morbidity = Mortality = 

Average Ratio of Morbidity from 1887 to 1894, inclusive, 34.64.

Average Ratio of Morbidity from 1895 to 1913, inclusive, 26.31.

Average Ratio of Mortality from 1887 to 1894, inclusive, 2.98.

Average Ratio of Mortality from 1895 to 1913, inclusive, 1.46.

Table B shows the number of cases of diphtheria that were treated at the Boston City Hospital proper and at the South Department from 1888 to 1913, inclusive, and the number of intubations for the same time. It is interesting to note that the percentage of recoveries from 1888 to 1894 was 17.50, whereas the percentage of recoveries from 1895 to 1913, inclusive, was 68.95.

Chart C shows the ratio of mortality of diphtheria per 10,000 of the population in Boston from 1877 to 1913, inclusive. It is worthy of note that from 1877 to 1894, inclusive, the ratio of mortality per 10,000 of the population in Boston was 13.87. The ratio of mortality from 1895 to 1913, inclusive, was 4.46.

Chart D gives the ratio of morbidity and ratio of mortality of scarlet fever in Boston per 10,000 of the population, from 1887 to 1913, inclusive.

The importance of increased accommodations for the treatment of scarlet fever and diphtheria has already received the earnest attention of the Board of Trustees. As has been stated in the trustees' report, land has been purchased on which to erect buildings, giving the South Department a much enlarged capacity for the treatment of scarlet fever, diphtheria and measles. This will be of great advantage to the city, and will decrease the ratio of morbidity and the ratio of mortality from these diseases.

HOW THE CITY DOLLAR IS DIVIDED,
1913-1914.

The diagram above shows how the city dollar is divided. The sum of forty-five and a quarter cents is paid for salaries and labor. The item of subsistence supplies is twenty-six and a half cents, and the other items, of course, are much smaller.

Table No. 1.

(These figures include all departments of the hospital except Out-Patient Departments.)

The tables of disbursements in this report show the expenditures of the Hospital Department during the fiscal year February 1, 1913, to January 31, 1914, inclusive. Table No. 1 shows the disbursements according to various subdivisions. Table No. 2 shows the cost per patient per day in the different departments for the year ending January 31, 1914. Table No. 3 shows the cost per patient per day for the year ending January 31, 1914. Table No. 4 shows the operating expenses for the year ending January 31, 1914. Table No. 5 shows the disbursements from February 1, 1913, to January 31, 1914, inclusive, in all departments. Table No. 6 is a comparison of the census and expenditures at the Boston City Hospital for the fiscal years ending January 31, 1909, 1910, 1911, 1912, 1913 and 1914. Table No. 7 shows the comparative net cost per patient at the main hospital, including the South Department, for thirteen years. Table No. 8 shows the cost of maintenance for a house officer per day for the year ending January 31, 1914. Table No. 9 shows the cost of maintenance for a nurse per day for the year ending January 31, 1914.

The total expenditures during the fiscal year for the Hospital Department, in its various branches,

have been \$616,301.02 and the disbursements have been made as follows:

Hospital proper and its subdivisions	\$408,503 47
Out-Patient Department	24,733 76
South Department	117,854 20
Haymarket Square Relief Station	38,220 27
East Boston Relief Station	17,154 72
Convalescent Home	9,834 60
<hr/>	
Total	<u>\$616,301 02</u>

* The actual uncooked food, provided for nurses themselves, costs 50 cents per day. The additional 5 cents is for food supplied domestics who cared for the nurses at the Vose House, Nurses' Home and estate, Massachusetts avenue and Northampton street.

The main hospital has four subdivisions, the hospital (wards) proper, Out-Patient Departments, the Pathological Department and the X-Ray Laboratory. The expenditures for the South Department for infectious diseases, the Haymarket Square Relief Station, the East Boston Relief Station and the Convalescent Home are kept in separate tables.

The expenditures upon the hospital proper and the South Department, together, were for the care of 16,170 patients in the wards for 290,138 days, or 41,448 weeks' board, which makes an average weekly cost of \$12.67, or a daily cost of \$1.81 for patients of all classes. The net cost per patient per week to the city was \$9.95. The cost of uncooked food supplies for all persons, including patients and the entire household at the hospital proper and South Department, was \$150,819.66. The average number of patients was 795, of officers and employees, including house and nursing staff, 605, or a total daily average of 1,400 persons. The number of weeks' board for all persons was 72,972 and the weekly cost per person for uncooked food supplies was \$2.07, or 29 $\frac{1}{4}$ cents per day.

The annual cost of the main hospital and that of the South Department are kept separately, in order to know the comparative costs and for the proper financing of the heaviest expenditures of the Hospital Department. But, practically, both divisions are for patients suffering with acute illnesses, and separated for purely hygienic rather than for financial reasons. Considered from this point of view, as a part of one whole, the cost is as follows:

The average weekly expenditure per patient in the hospital proper was \$14.53; the South Department was \$8.85, or an average of \$12.67 for each patient in the two departments. After deducting the income received on account of paying patients, the cost was reduced in the main hospital to \$11.69, at the South Department to \$6.29, or for both departments together an average weekly per capita cost of \$9.95, which accurately rep-

resents what each patient cost the city. No account is made in this computation of either the Out-Patient Departments, Convalescent Home or the Relief Stations.

The total expenditures in the Hospital Department have been \$616,301.02, but the net cost to the city for maintaining the main hospital was only \$412,315.64.

The maximum number of patients in the hospital proper on any one day was 674, as against 651 in the previous year. The minimum number was 412, in comparison with 449 for the previous year. The daily average during the year was 539, and the average length of stay was $14\frac{7}{10}$ days.

There have been treated in the various Out-Patient Departments 47,385 patients, at a cost of \$24,733.76. Other statistics may be found elsewhere, including the number of out-patients, number of their visits, rate of mortality, work of ambulances, census of days' board for all persons, the nativity of patients admitted and physical condition of patients when discharged.

The total number of deaths from February 1, 1913, to January 31, 1914, was 1,506. This does not include the statistics of the South Department, but only the main hospital.

Of the deaths, there occurred within

48 hours of admission	574, or $4\frac{3}{10}$ per cent.
Other deaths	932, or $6\frac{1}{10}$ per cent.

Total 1,506, or $11\frac{2}{10}$ per cent,
the rate of mortality for the year ending January 31, 1914.

This percentage of deaths is for the *total number of patients treated* in the hospital. The deaths occurring within forty-eight hours of admission (574) were 38.11 per cent of the whole number of deaths (1,506).

During the year 13,419 patients were treated in the wards, 47,385 as out-patients, 397 at the Convalescent Home, 2,751 at the South Department; at the Haymarket Square Relief Station 1,252 were treated in the

wards and 38,465 as out-patients, and at the East Boston Relief Station 258 were treated in the wards and 12,802 as out-patients,—a total of 116,729 who have received the benefits of the hospital in all departments.

During the year 16,198 persons applied for admission at the main hospital. Of this number 12,834 were admitted and 3,364 were rejected, the latter being 482 more than last year. The number rejected was 21 per cent of all persons applying, and the causes of rejection appear in the table of applicants not admitted, on page 39. Of the number applying 1,068 either changed their minds or were admitted later; of these, 107 were received within three days after application and 39 admitted still later. There were 206 applicants rejected for want of vacant beds, but of these 31 were admitted later. There were 907 of these applicants who could be treated more properly in the various out-patient services without the additional cost of receiving them in the wards. Admission was denied to 617 for lack of information that they were suitable cases; of these, 206 were received within three days after application and 10 were admitted later; and 541 were rejected as apparently incurable or unsuitable for treatment here. Various other causes of rejection appear in the tabulated form on page 39.

South Department.—The total expenditure for the South Department was \$117,854.20, against \$105,009.22 for the previous year, and, allowing for the difference in stock at the beginning and close of the year, the sum of \$118,086.20 represents the cost of maintenance for the fiscal year. The per capita weekly cost at the South Department was \$8.85.

Out-Patient Services.—The cost of maintenance in the various out-patient services was \$24,733.76.

Convalescent Home.—The cost of maintenance for the Convalescent Home was \$9,955.60. The daily average was $21\frac{3}{10}$ patients, and the average weekly cost \$8.96.

HAYMARKET SQUARE RELIEF STATION.

The following are the principal statistics of the Haymarket Square Relief Station for the year:

Number of patients remaining in Haymarket Square Relief Station January 31, 1913	9
Admitted from February 1, 1913, to January 31, 1914, inclusive	1,243
	<hr/>
Treated during the year	1,252
Discharged during the year	1,075
Died during the year	169
	<hr/>
	1,244
	<hr/>
Number of patients remaining in Haymarket Square Relief Station January 31, 1914	8
Number of out-patients treated	38,465
Largest number of out-patients treated on any one day	254
Number of major surgical operations	111
Number of deaths	169
Number of deaths within twenty-four hours of admission	111
Number of days' treatment given patients in the wards	3,600
Largest number of ward patients on any one day	20
Smallest number of ward patients on any one day	2
Average stay of ward patients in days	2.88
Daily average in wards	9.86
Number of ambulance calls	1,785
Number of ambulance trips for transfers of admitted patients to hospital proper	467
Miscellaneous ambulance trips	50
	<hr/>
	2,302
Number of patients transferred to hospital proper	773
Number of cases brought in by police ambulances and patrol wagons	1,355
Number of cases brought in by carriages and automobiles	393
Total operating expenses	\$38,220.27

EAST BOSTON RELIEF STATION.

The following are the principal statistics for the year:

Number of patients remaining in the East Boston Relief Station January 31, 1913	4
Admitted from February 1, 1913, to January 31, 1914, inclusive	254
	<hr/>
Treated during the year	258
Discharged during the year	225
Died during the year	26
	<hr/>
	251
Number of patients remaining in East Boston Relief Station January 31, 1914	7
Number of out-patients treated	12,802
Number of visits of out-patients	29,344
Largest number of out-patients treated on any one day,	156
Number of major surgical operations	16
Number of deaths	26
Number of deaths within twenty-four hours of admission	14
Number of days' treatment given patients in the wards	1,762
Largest number of ward patients on any one day	10
Smallest number of ward patients on any one day	0
Average stay of ward patients in days	6.8
Daily average in wards	4.8
Number of ambulance trips for transfers of admitted patients to hospital proper	82
Number of trips by East Boston Relief Station ambulance	28
Number of patients transferred to hospital proper	101
Number of cases brought by police ambulances, patrol wagons, carriages, automobiles, etc.	399
Number of patients carried by East Boston Relief Station ambulance	27
Number of patients accidentally injured admitted to the wards	132
Total operating expenses	\$17,154.72

CONVALESCENT HOME.

The statistics of the Convalescent Home, which has just completed its twenty-third year, are as follows:

Number of patients in Home January 31, 1913	24
Admitted during the year	373
<hr/>	
Treated during the year	397
Discharged during the year	375
<hr/>	
Number remaining in Home January 31, 1914	22
Largest number of patients on any one day	36
Smallest number of patients on any one day	9
Daily average number of patients	21.29
Average stay of patients in days	19.57
Total operating expenses	\$9,834.60

The hospital carpenters during the year have been actively employed in easing doors and windows, repairing furniture and locks, and other necessary and important work. The hospital painters have done a great amount of work in painting walls, setting glass and painting iron furniture, not only at the main hospital but at the South Department and Relief Stations. The painting of the iron furniture is a very important part of the work of the painters.

MEDICAL LIBRARY.

Number of books in library February 1, 1913	3,040
Number of books added to library from February 1, 1913, to January 31, 1914:	
By purchase	42
By donation	48
	<hr/>
	90
<hr/>	
Number of books in library January 31, 1914	3,130

For all books received during the year index cards have been written and filed.

There have been received during the year 228 medical monographs and reprints, 234 hospital and health reports and 530 periodicals.

Two thousand three hundred and nine index cards of patients' records have been written and 11,200 filed, making the total number of cards available 290,372.

TRAINING SCHOOL FOR NURSES.

The Training School for Nurses has now completed its thirty-fifth year. The changes in the nursing staff during the year have been as follows:

SUMMARY FROM FEBRUARY 1, 1913, TO JANUARY 31, 1914.

February 1, 1913, the number of nurses and matrons
was 205

During the year nurses have left as follows:

Head nurses resigned	16
Pupils graduated	26
Pupil nurses dropped from roll	23
Probationers dropped from roll	26
Pupils from affiliated schools completed course as follows:	
Medfield State Hospital	1
Taunton State Hospital	14
Boston State Hospital	2
New England Hospital	11
Worcester Memorial Hospital	8
Leonard Morse Hospital	3
—	39
Pupils from affiliated schools who withdrew,	6
Post graduate pupils who completed course,	11
Post graduate pupils who withdrew	3
Graduate special nurses who withdrew	6
—	
Total graduations and resignations	<u>156</u>
Number of nurses remaining	49
Graduates retained	7
Graduates re-employed	12
Pupil nurses readmitted	14
Probationers admitted	75
Post graduate pupils admitted	11
—	
<i>Carried forward</i>	168

<i>Brought forward</i>		168
Pupils from affiliated schools admitted as follows:		
Medfield State Hospital	5	
Taunton State Hospital	11	
Boston State Hospital	4	
New England Hospital	11	
Worcester Memorial Hospital	9	
Leonard Morse Hospital	4	
	—	44
Graduate special nurses	2	
	—	
Total number remaining January 31, 1914		<u>214</u>

Nurses connected with the school, in the main hospital, January 31, 1914:

Superintendent of nurses	1	
Assistant superintendents of nurses	3	
Instructor of probationers and acting assistant,	2	
Head nurses	19	
Senior assistant nurses (third year)	29	
Senior assistant nurses (second year)	38	
Junior assistant nurses	18	
Probationers	15	
Medfield State Hospital nurse	1	
Leonard Morse Hospital nurses	2	
Taunton State Hospital nurses	4	
Worcester Memorial Hospital nurses	2	
Boston State Hospital nurses	4	
Post graduate nurses	6	
Graduate special nurses	2	
Senior pupils at Maternity Hospital	9	
Senior pupils at Boston State Hospital	2	
	—	157

In the South Department January 31, 1914:

Assistant superintendent of nurses	1	
Supervisors of nurses	2	
	—	
<i>Carried forward</i>	3	<u>157</u>

<i>Brought forward</i>	3	157
Head nurses	4	
Senior assistant nurses	10	
Junior assistant nurses	25	
Medfield State Hospital nurse	1	
	—	43

Haymarket Square Relief Station:

Matron	1	
Head nurse	1	
Senior assistant pupil (third year)	1	
Senior assistant pupil (second year)	1	
New England Hospital nurses	2	
	—	6

East Boston Relief Station:

Matron	1	
Senior assistant nurse (third year)	1	
Senior assistant nurses (second year)	2	
New England Hospital nurses	2	
	—	6

Convalescent Home:

Matron	1	
Head nurse	1	
	—	2

Total	<u>214</u>
-----------------	------------

Twenty-six nurses graduated during the year, making a total of 1,148 since the school was organized.

Seventy-five probationers have been admitted. Twenty-two nurses have finished their obstetrical training and nine are now taking the course. Thirty-nine pupils from affiliated schools have completed courses of from three to six months and eleven graduate nurses have completed post graduate work.

The Superintendent of Nurses and her assistants have given 358 class recitations at the hospital proper and 182 at the South Department. The instructor of probationers and her assistant have held daily demonstrations and drills in the practice room and class instruction in the school room.

The school has received thirty-two lectures on Friday afternoons from members of the medical, surgical, neurological, gynæcological and pathological staffs. The senior pupils have attended six medical clinics held by Dr. William H. Robey, and ten clinics in bacteriology by Dr. Alexander M. Burgess and Dr. F. Stuart Graves. Sixty nurses attended an autopsy performed by Doctor Graves. The house surgeons held the usual practical bandaging classes following Dr. John B. Blake's lecture on "Bandaging."

Mrs. Gulli J. Callowhill has given forty-six lessons in massage to classes of four pupils each.

Miss Lydia Lee, the dietitian, has given twenty-eight cooking lessons to the probation classes, forty to the junior classes and twenty-five to the senior classes. Twenty-four senior nurses have had from one to two months' practical experience in the diet kitchen, where the various special diets and many private trays are prepared. During the year two extra hours weekly have been given to the pupil nurses for special study.

The fifth public graduating exercises of the Training School for Nurses were held in the amphitheater on May 23, 1913. Miss Mary M. Riddle addressed the graduating class. The diplomas were presented by the superintendent, Dr. John H. McCollom. Following this a reception was held in the Vose House.

The Nurses' Club has held its monthly meetings at the Vose House, and its members have enjoyed the various programs provided. Miss Alice T. Grady kindly gave a talk to the nurses on "Savings," which was much appreciated.

CHANGES IN EXECUTIVE DEPARTMENT.

In July, the Pathological Department Staff was changed by the resignation of Richard S. Austin, M. D., First Assistant in Pathology, and L. Whittington Gorham, M. D., Second Assistant in Pathology, and the appointment of F. Stuart Graves, M. D., as First Assistant in Pathology, and F. A. McJunkin, M. D., as Second Assistant in Pathology.

Edward F. Brennan, M. D., Assistant Resident Physician at the South Department, resigned in February, and Clifton L. Buck, M. D., was appointed to the position. Dr. Buck resigned in October, and Robert B. Hunt, M. D., was appointed Assistant Resident Physician.

Dunlap P. Penhallow, M. D., Resident Surgeon at the East Boston Relief Station, resigned in May. Joseph G. Hegarty, M. D., Assistant Resident Surgeon, was made Resident Surgeon, and John G. Breslin, M. D., Assistant Resident Surgeon.

I wish to express my heartfelt appreciation of the watchful coöperation of the heads of departments during the year. The cordial relations existing between the Staff and the Executive Department have been continued during the past year, which is a cause for congratulation.

In presenting the fiftieth annual report, I wish to express my gratitude to the trustees for their continued support and confidence.

I have the honor to be,

Very respectfully,

Your obedient servant,

JOHN H. MCCOLLOM,
Superintendent and Medical Director.

MEDICAL AND SURGICAL STATISTICS.

SURGICAL OPERATIONS.

ON HOUSE PATIENTS IN THE SURGICAL SERVICES.

From February 1, 1913, to January 31, 1914, Inclusive.

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
DRESSING OF WOUNDS. Including Cleansing, Curettling, Suturing, etc.	27	27	4	18	5	27	Septicæmia, 2 days. Myocarditis, 8 hours. Shock, on table. Shock, 8 hours. Shock, 12 hours.
Incision and Drainage...	210	102	312	30	246	2	22	12	312	Exhaustion, 4 days. Septicæmia, 14 days. Septicæmia, 9 days. Septicæmia, 7 days. Septicæmia, 2 days. Septicæmia, 8 hours. Septicæmia, 10 hours.
Excision of Tissue.....	57	34	91	2	81	3	4	1	91	Hæmorrhage, 26 hours.
Operations upon Skin and Appendages.....	12	11	23	21	2	23	
Operations upon Bones:										
Bone Plating and Removal of Bone Plates.....	14	2	16	12	4	16	
For Fracture:										
a. Simple.....	54	18	72	51	1	17		72	Pneumonia, 5 days. Shock, 12 hours. Erysipelas, 6 weeks.
b. Compound.....	48	12	60	41	15	4	60	Shock, 54 hours. Cardiac, 17 days. Exhaustion, 11 days. Shock, 6 hours.
c. For Correction of Deformity.....	57	16	73	50	1	21	1	73	Pneumonia, 2 weeks.
d. For Osteomye- litis.....	15	15	9	4	2	15	Toxæmia, 5 days. Septicæmia, 2 days.
e. For Curetting....	5	5	5	5	
f. For Necrosis....	2	1	3	1	2	3	
Trephining:										
a. Exploration.....	3	1	4	1	2	1	4	Shock, 6 hours.
b. For Bony Lesions..	8	5	13	3	1	9	13	Shock, 12 hours. Shock, 5 hours. Shock, 6 hours. Shock, 6 hours. Shock, 6 hours. Shock, 10 hours. Shock, 6 hours. Shock, 16 hours. Exhaustion, 6 days.

SURGICAL OPERATIONS.—*Continued.*

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
c. For Brain Lesions..	6	5	11	1	3	1	6	11	Paralysis, 4 hours. Shock, 2 days. Shock, 3 days. Shock, 9 days. Shock, 14 hours. Shock, 4 hours.
d. Upon Bones other than Skull.....	1	1	1	1	
Amputations:										
a. Finger or Toe.....	30	6	36	6	28	2	36	
b. Upper Extremity:										
Hand.....	1	1	1	1	
Arm.....	5	5	3	2	5	
c. Lower Extremity:										
Foot.....	4	1	5	3	1	1	5	Shock, 29 hours.
Leg.....	14	1	15	7	2	6	15	Cardiac Dilatation, 4 days. Shock, 8 hours. Delirium Tremens, 12 days. Septicæmia, 4 days. Septicæmia, 36 hours. Exhaustion, 6 days.
Thigh.....	7	7	6	1	7	
Operations upon Joints and Ligaments:										
a. Reduction of Dislo- cation.....	13	11	24	22	2	24	
b. Incision and Drain- age.....	7	4	11	9	2	11	
c. Resection or Exci- sion.....	2	7	9	8	1	9	
d. Erasion.....	1	1	1	1	
e. Foreign Bodies....	7	7	4	3	7	
Operations upon Mus- cles and Tendons...	30	5	35	32	3	35	
Operations upon Blood Vessels:										
a. Arterial:										
For Hæmorrhage,	3	1	4	4	4	
Ligation or Su- ture.....	1	1	1	1	
Dissection and Removal.....	2	2	2	2	
For Aneurysm...	1	1	2	2	2	

SURGICAL OPERATIONS.—*Continued.*

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
<i>b. Venous:</i>										
Ligation or Suture.....	14	8	22	17	5	22	
Dissection and Removal.....	12	11	23	22	1	23	
Transfusion.....	4	1	5	4	1	5	Hæmorrhage, 7 days.
Incision of Pericardium.....	1	1	1	1	
Injection of Salvarsan.....	6	6	12	12	12	
Operations upon Lymphatic System:										
<i>a. Neck.....</i>	4	8	12	11	1	12	Shock, on table.
<i>b. Axilla.....</i>	1	1	1	1	
<i>c. Groin.....</i>	2	2	2	2	
Operations upon Nervous System:										
<i>a. Brain.....</i>	2	2	1	1	2	Shock, 30 hours.
<i>b. Cord.....</i>	3	1	4	3	1	4	Pneumonia, 48 hours.
<i>c. Peripheral.....</i>	9	13	22	19	3	22	
<i>d. Alcohol injection..</i>	3	3	3	3	
Operations upon Alimentary System, not Involving Abdominal Section:										
<i>a. Mouth, Tongue, Salivary Glands..</i>	4	2	6	4	2	6	(Pneumonia, 6 days. Pneumonia, 4 days.
<i>b. Oesophagus.....</i>	1	2	3	3	3	
<i>c. Rectum.....</i>	25	25	23	1	1	25	Exhaustion, 21 days.
<i>d. Anus.....</i>	1	1	1	1	
Fistula.....	49	12	61	55	6	61	
Hæmorrhoids....	93	25	118	108	10	118	
Operations upon the Respiratory System:										
<i>a. Trachea.....</i>	3	1	4	2	2	4	Exhaustion, 40 days. Pneumonia, 2 days.
<i>b. Lungs and bronchi,</i>	12	7	19	12	2	5	19	Shock, 6 hours. Exhaustion, 16 hours. Septicæmia, 16 days. Septicæmia, 8 days. Cardiac, 2 weeks.
<i>c. Pleura.....</i>	21	14	35	29	1	5	35	Septicæmia, 4 hours. Septicæmia, 25 days. Myocarditis, 7 days. Myocarditis, 15 days. Exhaustion, 2 days.

SURGICAL OPERATIONS.—*Continued.*

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
Operations upon Urinary System:										
<i>a. Male:</i>										
Kidney.....	18	4	22	16	2	4	22	{ Shock, 30 hours. Shock, 6 hours. Shock, 48 hours. Exhaustion, 36 days.
Ureter.....	4	4	3	1	4	
Bladder.....	43	43	5	35	1	2	43	{ Shock, 30 hours. Shock, 24 hours.
Urethra.....	67	67	53	6	8	67	{ Toxæmia, 24 hours. Pneumonia, 8 days. Cardiac, 3 days. Septicæmia, 5 days. Shock, on table. Toxæmia, 4 days. Exhaustion, 15 days. Septicæmia, 14 days.
<i>b. Female:</i>										
Kidney.....	17	17	16	1	17	
Ureter.....	1	1	1	1	
Bladder.....	18	18	3	12	3	18	
Operations upon Genital System, not Involving Abdominal Section:										
<i>a. Male:</i>										
Penis.....	13	13	13	13	
Testicle.....	70	70	67	3	70	
Prostate.....	23	23	15	3	5	23	{ Toxæmia, 5 days. Toxæmia, 2 days. Exhaustion, 5 days. Exhaustion, 5 days. Exhaustion, 20 days.
<i>b. Female:</i>										
Vagina.....	3	3	3	3	
Vulva.....	2	2	2	2	
Uterus.....	6	6	5	1	6	
Hernia:										
<i>a. Inguinal.....</i>	202	17	219	199	17	3	219	{ Septicæmia, 11 days. Septicæmia, 3 days. Exhaustion, 11 days.
<i>b. Femoral.....</i>	5	21	26	21	2	3	26	{ Toxæmia, 12 days. Toxæmia, 8 days. Exhaustion, 6 hours.
<i>c. Umbilical.....</i>	4	13	17	13	2	2	17	{ Shock, 2 hours. Pneumonia, 2 days.
<i>d. Post Operative....</i>	6	4	10	9	1	10	
<i>e. Ventral.....</i>	1	6	7	5	1	1	7	Pneumonia, 3 days.
<i>f. Other forms.....</i>	6	2	8	5	1	2	8	{ Shock, 12 hours. Shock, 20 hours.

SURGICAL OPERATIONS.—*Continued.*

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
Operations upon Organs of Special Sense:										
<i>a.</i> Nose.....	2	2	2	2	
Abdominal Section:										
<i>a.</i> Exploratory.....	28	24	52	36	1	3	12	52	Exhaustion, 6 hours. Septicæmia, 3 days. Infection, 5 days. Cardiac, 6 days. Peritonitis, 3 hours. Peritonitis, 4 hours. Peritonitis, 4 days. Pneumonia, 38 days. Shock, 3 days. Shock, 30 hours. Shock, 18 days. Exhaustion, 48 hours.
<i>b.</i> Stomach.....	22	13	35	25	2	3	5	35	{ Shock, 6 hours. Shock, 7 hours. Exhaustion, 6 days. Exhaustion, 4 days. Peritonitis, 2 days.
<i>c.</i> Gastro-enterostomy,	2	2	1	1	2	Exhaustion, 40 days.
<i>d.</i> Duodenum.....	2	2	1	1	2	Exhaustion, 2 days.
<i>e.</i> Small Intestine....	7	8	15	7	1	7	15	{ Exhaustion, 6 days. Exhaustion, 4 days. Exhaustion, 3 days. Shock, 12 hours. Exhaustion, 2 days. Pneumonia, 11 days. Shock, 1 day.
<i>f.</i> Colon.....	2	2	4	4	4	{ Toxæmia, 9 days. Shock, 9 hours. Shock, 2 days. Infection, 14 hours.
<i>g.</i> Appendix:										
<i>a.</i> Acute.....	102	88	190	175	12	3	190	{ Septicæmia, 3 days. Shock, 24 hours. Pericarditis, 4 days.
Preperforative ...	104	74	178	141	31	6	178	{ Shock, 12 hours. Shock, 50 hours. Shock, 48 hours. Shock, 30 hours. Shock, 42 hours. Shock, 31 hours.
With Localized Abscess.....	70	48	118	101	5	12	118	{ Cardiac, 2 days. Peritonitis, 6 days. Peritonitis, 2½ days. Peritonitis, 3 days. Pneumonia, 3 weeks. Shock, 2 days. Shock, 12 hours. Shock, 12 hours. Shock, 24 hours. Toxæmia, 2 days. Toxæmia, 2 days. Toxæmia, 30 hours.
With Diffuse Peritonitis.....	5	3	8	3	1	4	8	{ Shock, 12 hours. Embolism, 13 days. Toxæmia, 1 day. Shock, 12 hours.

SURGICAL OPERATIONS.—Continued.

OPERATIONS.	Males.	Females.	Total.	Well.	Relieved.	Not Relieved.	In Hospital.	Died.	Total.	REMARKS.
With General Peritonitis,	15	5	20	3	1	1	15	20	Myocarditis, 5 days. Septicæmia, 2 days. Septicæmia, 4 hours. Septicæmia, 4 hours. Shock, 2 days. Shock, 20 hours. Toxæmia, 3 days. Toxæmia, 5 days. Septicæmia, 12 hours. Septicæmia, 10 hours. Septicæmia, 6 hours. Shock, 2½ hours. Shock, 9 hours. Peritonitis, 6 days. Shock, 12 hours.
b. Interval.....	23	22	45	42	3	45	
h. Liver.....	3	3	1	2	3	Septicæmia, 6 days. Shock, 2 days.
i. Gall Bladder and Bile Ducts.....	19	49	68	52	6	10	68	Hæmorrhage, 36 hours. Exhaustion, 2 days. Shock, 16 hours. Toxæmia, 3 days. Shock, 1 day. Shock, 5 days. Edema of Brain, 22 days. Septicæmia, 4 days. Septicæmia, 7 days. Septicæmia, 11 days
j. Abdominal Sinus..	2	2	2	2	
k. Pancreas.....	1	2	3	2	1	3	Shock, 16 hours.

<i>Patrick A. Collins Memorial Library Fund.</i> — For the purchase of new books for the use of hos- pital patients and for the replacing of those that have become damaged, lost or destroyed	500 00
<i>Mehitable C. C. Wilson Fund.</i> — For the benefit of the Medical Library	400 00
<i>Nurses' Fund.</i> — To be used under direction of superintendent and staff for employment of special nurses	10,000 00
Total	<u>\$86,950 00</u>

FUNDS WITH BOTH PRINCIPAL AND INTEREST AVAILABLE.

<i>Wyman Building Fund.</i> — Rest and residue of the Thomas T. Wyman estate. Balance on hand January 31, 1914	\$5 45
<i>Patrick A. Collins Memorial Library Fund.</i> — To purchase bookcases and books for the use of hospital patients. Balance on hand January 31, 1914	719 57
<i>Francis Bartlett Bequest.</i> — To be used to purchase radium and X-ray apparatus	5,000 00
Total	<u>\$5,725 02</u>

THE BOSTON CITY HOSPITAL TRAINING SCHOOL FOR NURSES.

The trustees of the Boston City Hospital in 1878 established a Training School for Nurses, the fourth organized in the United States, in order to give to women desirous of becoming professional nurses a systematic course of training and practice.

The Training School is controlled by the trustees of the hospital, like all other departments of the hospital service. The Superintendent of the Hospital has the general supervision of all matters relating to the school, its course of work and study, lectures and discipline. The Superintendent of Nurses has the immediate charge of all the nursing in the hospital, of all persons employed in the wards, and also the instruction and management of the nurses in the Training School. All female nurses in the hospital must be connected with the school.

The hospital in all its departments contains 1,061 beds for patients, as follows:

Main Hospital	655
South Department for Infectious Diseases	340
Haymarket Square Relief Station	20
East Boston Relief Station	10
Convalescent Home	36
Total	<u>1,061</u>

The number and variety of cases in each department afford ample material for observation and instruction. The course requires three years, and includes general medical and surgical nursing, together with ophthalmic, aural and gynæcological nursing, also the nursing of children, and infectious diseases and of emergency

surgical work. There are no maternity wards connected with the hospital, but a course in maternity nursing has been provided at maternity hospitals elsewhere, without extra cost to the nurse.

The most desirable age for candidates is from twenty-one to thirty-five years. They must be of sound health, and should send with their application a certificate from a physician certifying to the fact. They should also send a brief personal history, and give the names and addresses of three responsible persons, not of their own kin, preferably their last employer, if any, or business men of their acquaintance, who know of their good character and capabilities. Upon the recommendation of the Superintendent of the Hospital and Superintendent of Nurses, they will be received for three months on probation. The fitness of candidates for the training and work, and the propriety of retaining or dismissing them, will be determined by the authorities in charge of the school, under the direction of the trustees. An entrance examination is given to all candidates before or during the term of probation. The examination is in simple arithmetic, English composition, and writing from dictation, etc., and is in no sense so severe as to prevent anyone who is capable of undertaking the work of a trained nurse from so doing. The Superintendent of Nurses will have a personal interview with candidates for the school on Tuesdays from ten to twelve o'clock.

At the end of the second month candidates, if considered satisfactory, are permitted to wear the cap and enter upon the regular course of training, but such candidates are not permitted to join the school formally until the end of the third month, when, if accepted, they sign an agreement to complete the prescribed course of three years, and to conform to all rules. At the end of the first six months the record and work of each pupil are carefully scrutinized as to her fitness to make a good nurse, and the right is reserved by the authorities of the hospital to terminate then, or at any

time, the connection of any pupil or nurse with the school, for inefficiency, misconduct, generally unsatisfactory record, or for any other reason which may be deemed sufficient.

The nurses in the Training School (including probationers) reside at the three nurses' homes connected with the hospital. These houses are attractive and homelike, and have the best of conditions necessary to good health and personal hygiene, while recreation and amusement, necessary to a wholesome life, have been considered in the music room, library and reception rooms provided.

The Superintendent of Nurses has the immediate charge of the Training School, under the authority of the Superintendent of the Hospital and of the trustees, and the nurses are subject to the rules of the hospital, like any other service.

The instruction includes the general care of the sick, the making of beds, changing bed and body linen, managing of helpless patients in bed, etc., giving baths, keeping patients warm or cool, prevention or dressing of bed sores, and proper management of the patient under various conditions, with different diseases or injuries; the making and applying of bandages and rollers, preparation of splints, application and management of surgical apparatus, applying of fomentations and poultices, the dressing of burns, ulcers and wounds, and other minor dressings, cupping, leeching and subsequent treatment, the administering of enemata, and the use of the female catheter.

Nurses are taught how to act in the various emergencies occurring in hospital and private nursing, as well as in the accidents of ordinary life. They are also given lessons in massage by a professional instructor. There is a systematic course of training in cookery for the sick, the serving of food and delicacies in the proper manner, and the feeding of helpless patients or those who resist food.

Instruction is also given in the best practical methods of supplying fresh air, of warming and ventilating sick rooms in a proper manner, and the proper care of sick rooms for the best good and comfort of the patient; in keeping all utensils and appliances perfectly clean and disinfected; in making accurate observations of the pulse, temperature, respiration, expectorations, the secretions, state of the skin and eruptions; of mental condition as to delirium, stupor, shock, etc.; of the condition as to sleep, appetite, effects of diet or of stimulants and medicines; the behavior of wounds and the after-treatment in surgical operations; and in the managing of convalescents. Nurses are taught the administering of medicines and the application of external remedies, how to take notes on cases, the making up of the nurses' record, and the reports to the attending doctor.

The three years' course of training includes a preparatory course of three months under a special instructor, followed by a fixed course of instruction from manuals and text-books, mainly given by the Superintendent of Nurses, the assistant superintendents of nurses, and graduate head nurses. Lectures and demonstrations, chiefly upon practical points, are given at stated times by the medical and surgical staff of the hospital. While the instruction by the manuals, text-books, lectures, demonstrations, quizzes and models is considerable, the main reliance is upon accurate daily drill in the wards, operating rooms, and other departments of the hospital. Examinations, both oral and written, are held from time to time by the authorities of the school, and nurses will not be graduated unless they attain, on critical marking, at least 70 per cent.

The pupils are employed as assistant nurses in the wards, operating rooms, Out-Patient Departments of the hospital, and the two Relief Stations. They are given eight months' training in medical wards, eight months in surgical wards, six months in contagious wards, four months in gynæcological wards, four months in a maternity hospital and from three to six months

elective. No class recitations or lectures are given between July 1 and October 1 except to the probation class.

Probationers are not paid during their first two months, but for the remaining ten months of the first year they receive \$5 a month, for the second year \$8.33 a month, and for the third year \$12.50 a month while on duty in the hospital, to pay for the expenses of their uniform, personal clothing and other minor requirements.

While on duty in a maternity hospital they will receive the allowance provided by the hospital to which they are assigned. This sum is in nowise intended as wages, it being considered that their education during this time is a full equivalent for their services. When the term of three years is completed the nurses receive, if they pass all the examinations, and are otherwise satisfactory, a diploma certifying to the regular course of training and practice, and are then permitted to wear the graduate's badge of the school.

The majority of graduates engage in private nursing, but some are invited to remain in the service of the hospital as head nurses, with opportunities of promotion here or in other hospitals. Graduate head nurses who prefer to remain in hospital work, or return after a term of private nursing, are given post graduate instructions in ward management, hospital housekeeping and minor administration, fitting them to fill positions of trust in hospitals or other institutions.

The school year has no fixed date, but accepted candidates are, as a rule, received in classes beginning every three months. Those desiring to enter with less delay can sometimes anticipate a fixed date by placing themselves on the emergency list. When coming to the hospital they should bring with them the following articles: Three gingham calico dresses, made plainly, with high neck and long sleeves, eight large white aprons, made of bleached cotton, two yards wide, meeting in the back, with bibs, without straps, plain at the top and gathered slightly at the bottom, two

pearl studs on the band, two inches wide, with hem at bottom five inches in depth, and two inches from the bottom of the dress; two bags for soiled clothes; one pair of scissors, a pin-ball, and a plain napkin ring with nurse's name; a good supply of plain underclothing — every article to be distinctly marked with pen and indelible ink, with the owner's name. Twenty-one pieces are allowed for the laundry each week.

Nurses must bring suitable outer garments for stormy weather, and they are required to wear boots that will be purchased on prescription of our orthopedic surgeon, after coming to the hospital. If the teeth are out of order in any way, they must receive attention before coming for the probationary month. Nurses are required to wear the training school uniform after they join the school. Material for dresses will be sold at cost price; caps are furnished at a nominal price. Probationers should come prepared, on acceptance, to expend about \$20 for uniforms, books and other needful expenses.

Hours of duty for day nurses will vary from six to twelve hours between the hours of 7 a. m. and 8 p. m.; for night nurses, from 8 p. m. to 7 a. m. No nurse is required to do both day and night duty on the same day, except in rare emergencies. Each nurse on day duty is allowed two hours for rest and recreation; one-half day, after 1.30 p. m., each week, and four hours on Sunday. Supervised study hours are provided. Two weeks' vacation with pay is allowed each year, and one week without pay as leave of absence during the third year. If nurses are sick they are cared for in the hospital, but pay is stopped, except for illness or injury received in the line of duty. Pupils may be expected to have a percentage of any considerable time lost by illness or absence added to their three years, at the discretion of the management. Nurses on night duty are required to be in bed from 9 a. m. until 4 p. m. Nurses may be called upon for seven months' regular night duty during the three years' training, besides "special cases" to a limited number.

COURSE OF INSTRUCTION.

I. PROBATIONERS' COURSE.

The first week the probation class meets in the practice room daily for practical instruction, in the making of beds, including the use of bed rests, cradles, etc.

The care of rooms, sweeping and dusting.

Care of set bowls, wall stands and utensils.

Care of linen rooms, the folding of linen.

The use of hot and cold applications, including the making of fomentations and poultices.

The care of rubber goods.

The making of surgical supplies, pads, sponges, tampons, etc.

The use of slings, binders and supports.

During this time the class is instructed in the use of antiseptics, disinfectants and deodorants, and the preparation of solutions.

Tables of weights and measures.

The use of abbreviations and symbols.

The principles of ventilation.

The temperature of the body. Heat production and radiation.

The use of the clinical thermometer and charts.

The giving of baths, care of the back, mouth, etc.

From the seventh (7th) to the tenth (10th) day allowed to go to the wards, make beds, sweep, dust and fold linen (hours from 7 to 10.30 a. m.).

The tenth (10th) day assigned to wards for regular duty, and during the remaining weeks of the probation course three hours each day will be devoted to class and practice room work, with one additional hour for recreation.

Total Hours of Study and Ward Work in Three Months' Probation.

Anatomy, Physiology and Hygiene . . .	66 hours.
Practical Nursing and Practice Room . .	126 "
Materia Medica and Nursing Ethics . .	24 "
Lectures	12 "

Ward Work	481 hours.
Elementary Dietetics	8 "

I. FIRST YEAR.

Fever Nursing and Bacteriology	12 recitations.
Principles of Nursing. Hampton-Robb	12 "
Lectures by Physicians and Surgeons	37
Ward Clinics: Medical, Surgical, Gynæcological and Infectious.	

II. SECOND YEAR.

Anatomy, Physiology and Dietetics	12 recitations.
Materia Medica, Anatomy and Physiology	12 "
Special Instruction in Bacteriology	6 clinics.
Operating Room Technique	10 exercises.
Massage	6 recitations.
Special Lessons in Obstetrics	6
Obstetrical Course (4 to 6 months).	
Optional Course at Boston State Hospital	3 months.
Urinalysis	6 exercises.

III. THIRD YEAR.

Invalid Cooking	12 recitations.
Medical and Surgical Clinical Teaching by Paid Instructors	12 "
Anatomy, Hygiene and Ethics	12 "
Ward Management and Training School Administration	12 "
Elective Work in Operating Rooms, Out- Patient Departments, Relief Stations, Contagious Wards and Housekeeping Department.	

An excellent reference library is open to nurses for more extended reading upon subjects under consideration.

COURSE IN DIETETICS.

First Year Course.

FOUR PERIODS. ONE HOUR THEORY AND ONE HOUR PRACTICAL WORK.

Theory.

Food.—Definition, function, composition.

Cooking.—Reasons, methods, measurements, composition, preparation for the market, serving and the physiological effects of tea, coffee, cocoa and chocolate.

Tray setting and the serving of food in the wards.

Stoves.—History of stoves, manufacture and care of ranges.

Practical Work.

Preparation of beverages, broths, gruels, milk toast, cream toast, custards, junkets, jellies.

Cooking of eggs in various forms.

Cooking of steak, chops and bacon.

Preparation of fresh fruits for serving to patients.

Second Year Course.

TWELVE PERIODS. ONE HOUR THEORY AND TWO HOURS PRACTICAL WORK.

Theory.

Food.—Source, nutritive value, digestion and function, chemical composition, absorption.

Protein Foods.—Sources, composition, function, cooking of protein food.

Animal Protein.—Selection of meats, care of meats, cooking and serving of meats, poultry and game, gelatin, beef juice *v.* beef broths, raw meat *v.* cooked meat, various kinds of meat used in invalid cooking.

The classification, selection, care, cooking, serving, nutritive value, digestibility, tests for freshness of milk, butter, cheese, eggs, fish, vegetables, mollusks, crustaceans.

Water.—Sources, functions, varieties of drinking waters, sources of disease, manufacture of ice.

Mineral Matter.—Sources and functions.

Condiments.—Sources and functions.

Carbohydrates.—Classification, function, cooking, nutritive value, digestibility, cellulose.

Fats and Oils.—Sources, function, cooking, digestibility, food value.

Practical Work.

Preparation of trays for the private patients, including preparation of broths, soup, meat, fish, poultry, game, breads, vegetables, salads and salad dressings, hot and cold desserts, ices and ice cream, cakes and beverages for the private trays.

Senior Course.

FOOD AND FOOD VALUES. THEORY EIGHT HOURS.

Theory.

Diet in Childhood.

Diet in Disease.

Pure Food and what the Pure Food Laws have accomplished.

Calculating Dieters.

Planning Menus.

Digestion and Absorption of the Various Foods,

Practical Work.

One to two months' training in the diet kitchen.

LIST OF LECTURES AND SUBJECTS.

A lecture is given to the Training School on Fridays, at 4 p. m., in the Operating Amphitheater, by a member of the Medical and Surgical Staff, once a week between September 15 and June 30. The following are among the lectures given at various periods during the training:

Three.—Theory of wounds: Modes of healing, granulations, ulcers, cellulitis, suppuration, sloughs, erysipelas, pyæmia, gangrene, sepsis, etc. (with stereopticon).

Six.—Bacteriology, brief history and general theory: Micro-organisms; general distribution in air, water, etc. Elementary consideration of pathogenic and nonpathogenic micro-organisms. Exhibition of apparatus and cultures. Practical points for nurses.

Two.—Surgical anatomy and landmarks, hæmorrhages, etc.

One.—Fractures: Varieties, preparation and care of splints and apparatus for treatment, management of cases, etc.

Three.—Medicines: Avenues of taking; preparation of doses; classes of internal and external poisons; cautions; hospital formulæ.

One.—Nursing in fevers: Theory of fever, symptoms and course of, different plans of treatment, nurses' duties as to symptoms, bed, clothing, secretions, baths, food and management of cases.

Four.—Infectious fevers, especially diphtheria and scarlet fever: Symptoms and course of disease; complications; infection and contagion; special nursing in croup, laryngitis, tracheotomy, intubation, etc.; management of patient and surroundings; personal hygiene of nurse in attendance, etc.

Two.—Symptomatology in disease: What and how to observe accurately; vital organs and special symptoms. The model sick room; temperature, light, ventilation, care of bed, bedding, and clothing, furniture, utensils, disinfectants, cleansing, dusting, etc.

Three.—Care of children in health and disease: Diet and clothing of infants and children; various infantile diseases.

Two.—Physiology of pregnancy and labor: Delivery; confinement nursing.

One.—On gynæcological nursing: Preparation of patient for examination or operation; operations after treatment, douches, use of catheter, etc. (Demonstrations to sections of senior nurses in Ward S operating room.)

One.—Special nursing in nervous diseases, including the insane.

One.—Special nursing in diseases of the eye, and general care in health and disease.

One.—Special nursing in diseases of the ear, its care in health and disease; nurses' duties at operations and continued treatment in disease.

One.—Urine: Characteristics, properties, including taking notes on same, and brief analysis. Drill in laboratory by classes in sections.

Three.—Visceral anatomy: Demonstrations by post-mortems; care of the dead, etc.

One.—Suggestions to those about to engage in private nursing.

HOUSE RULES.

WITH RULES FOR ADMISSION, GOVERNMENT AND DIS-
CHARGE OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

The doors and gates of the hospital will be closed at ten o'clock in the evening, at which time all inmates, excepting head nurses, who are permitted to remain out until twelve o'clock midnight, shall be quiet, and all not on duty shall be in their rooms, unless otherwise specifically permitted.

All officers, nurses and employees of the hospital, when going and coming to and from the hospital, shall enter and go out by the entrance office, and by no other entrance. Such officers and employees as are required shall use the time register and method of booking that the hospital rules require.

A record shall be kept of all persons entering the hospital between the hours of 10 o'clock in the evening and 7.30 o'clock in the morning.

No employee shall be absent from the hospital except when permitted by special rules or by the Superintendent.

No officer, nurse, orderly or other employee shall, directly or indirectly, receive money or other gifts from or in behalf of patients, except with the approval of the Superintendent.

The use of tobacco, wine and intoxicating liquors is prohibited within the hospital, unless prescribed by the physicians or surgeons.

All profane and improper language, loud talking and incivility are prohibited.

All employees shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the hospital on each day of the week, Sunday excepted, between 9 o'clock a. m. and 6 o'clock p. m.

Whenever able a patient shall apply in person for admission; when not able to apply in person a patient may be admitted on application made in his behalf, or upon visit at his residence by the admitting physician.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Patients may be admitted to the privileges of the hospital at such rates of board as the trustees may from time to time by vote determine, payment for such board being secured by the friends of the patients or by the authorities of the cities or towns to which the patients belong.

Whenever, in the opinion of the trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the hospital, are provided, such payment shall be made therefor as the trustees shall deem reasonable.

No person having acute venereal disease or alcoholism shall be admitted, except as a paying patient.

No person shall be admitted to the hospital whose case is judged to be incurable, unless there be urgent symptoms which are deemed capable of being relieved.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the hospital.

Patients shall be in their proper places in the wards during the visits of the physicians and surgeons, and always before 7.30 o'clock in the evening, unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing and perform such other services as may be reasonably required of them.

No patient shall leave the hospital grounds without a pass from the Superintendent, nor leave his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him, any article of food whatsoever, or any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be granted when practicable.

Complaints, for whatever cause, may be made to the Superintendent, and whenever requested shall be by him reported to the trustees.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent.

Patients discharged on the recommendation of the visiting physicians or surgeons shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the hospital without the approval of the Superintendent a written statement to that effect shall be required from any person assuming the responsibility of the removal.

VISITORS.

No person shall visit any part of the premises except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent or of some one of the trustees.

Daily, from 2 to 3 o'clock in the afternoon, friends may be permitted to visit patients, though no patient shall receive more than two visitors at that hour; and from 6 to 6.30 o'clock on each week day friends may be permitted to visit patients, though no patient shall receive more than one visitor at that hour. In all cases,

however, the trustees and Superintendent may exercise discretionary powers as to excluding or admitting visitors.

When visitors are admitted outside of the regular visiting hours they shall not be permitted to remain more than half an hour, except a special permission to remain for further time is granted.

All visitors shall leave the hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the hospital, or pass the night therein, without permission of the Superintendent or one of the trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left at the entrance office.

SPECIAL RULES FOR THE GOVERNMENT OF THE SOUTH DEPARTMENT.

The department of the Boston City Hospital located on the westerly side of Massachusetts avenue shall be designated as the South Department of the Boston City Hospital. It shall receive patients who require treatment for diphtheria, scarlet fever, measles and for other infectious diseases as may be determined from time to time by the trustees.

The Superintendent of the Hospital shall, under the direction of the trustees, have the general control and management of this department in the same manner as of other departments of the hospital.

The rules of the hospital shall, so far as applicable, and except as hereinafter provided, apply to the various officers and employees and to the conduct and management of this department.

SPECIAL RULES FOR THE GOVERNMENT OF THE HAYMARKET SQUARE AND THE EAST BOSTON RELIEF STATIONS.

The Boston City Hospital Relief Stations are established not as hospitals, but as departments of the Boston City Hospital for temporary relief, and the rules and methods prevailing now in the hospital shall, so far as applicable, and not inconsistent with special rules, apply to the Relief Stations.

The stations shall afford temporary relief in all classes of accident and disease. They shall be open at all hours for patients requiring treatment or attention. Patients requiring ward treatment, whether received at the stations or taken up in ambulances, shall, so far as is consistent with their welfare, be forthwith trans-

ferred or carried to the hospital for extended treatment, but ward accommodations shall be afforded patients whose condition is such that they cannot properly be transferred. Patients may, however, if it is deemed desirable, be transferred by the ambulances to other hospitals or to their homes. First treatment may be afforded at the stations, although the applicants are not such as require ward treatment.

The Superintendent of the Hospital shall have the general administration, management and control of the stations, the same as of other departments of the hospital.

The Superintendent shall, from time to time, as may be necessary for each station, nominate for confirmation by the trustees a Resident Surgeon and one or more Assistant Resident Surgeons, and shall appoint and employ or detail for service in each department, subject to the approval of the trustees or of the proper committees, a Matron, a Supervisor, nurses, orderlies and such other minor employees as may be required for the proper conduct of the station, who shall be subject to his supervision.

The various officers and employees of the stations shall perform such duties other than those specified as may be required by the trustees or the Superintendent, according to the nature of their respective duties. The Resident Surgeons, the Matrons, Supervisors and such other officers as may be so required shall reside at the stations.

PATIENTS.

Alcoholic and insane patients shall not be received unless there is surgical or medical complication making hospital treatment absolutely necessary.

No patient, after being admitted to the wards, shall leave the station until his discharge without a pass from the proper officer, nor shall he visit other parts of the station without permission.

Ward patients shall be discharged by the Superintendent or Resident Surgeon.

AMBULANCE SERVICE AT THE HAYMARKET SQUARE
RELIEF STATION.

The ambulance service of the station shall be under the direct control of the Resident Surgeon, and shall coöperate with that of the hospital, with which it shall form one general system. Ambulances shall, in response to calls, be dispatched from the station or the hospital as the exigency may require. The utmost dispatch shall be exercised in the ambulance service, so far as is consistent with a regard for the welfare of the patient and the interest of the public.

Ambulances shall in general be sent from the station or the hospital at least upon a general alarm to all fires occurring in the city proper and in such further districts as may be determined upon.

An ambulance shall be held during the hours of the day in complete readiness to make immediate response to calls, and shall be kept in condition to make prompt response to calls at any time of the night.

A house officer shall accompany the ambulance, shall direct its course and shall have direction of the care and treatment of the patient until received at his destination.

The foreman of the ambulance service at the Hospital Station shall visit and inspect the Ambulance Department of the station from time to time, but the immediate carrying out of directions shall be under the assistant foreman at the station.

SPECIAL RULES FOR THE GOVERNMENT OF THE CONVALESCENT HOME.

The department of the Boston City Hospital located on Dorchester avenue, in Dorchester, shall be known as the Convalescent Home, and shall receive such patients recovering from acute diseases as shall be transferred to it from the main hospital for treatment during convalescence.

The Superintendent of the Hospital shall, under the direction of the trustees, have the control and management of the Convalescent Home in the same manner as of other departments of the hospital.

The Superintendent shall appoint, subject to the approval of the trustees, a Matron, and shall employ, under their direction, such further assistants as may be necessary for the proper conduct and service of the home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the home and the control of all nurses and other employees and patients. She shall reside at the home.

VISITORS.

Friends may be permitted to visit patients daily between three and four o'clock in the afternoon. In all cases the trustees, Superintendent and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the home and grounds at the expiration of the visiting hour, and shall visit no part of the home or grounds other than the reception room, except by permission from the proper authority.

No person shall give any article of food or drink to a patient unless by permission of the Matron.
